96.04 PR / 83.57%

PROJECTS

❖ **Home Insurance Portal (Team Project)**
Augmented Systems LLP

A comprehensive web-based insurance management system designed to streamline home insurance operations. Developed as part of a collaborative team project, implementing various insurance workflows and policy management features.

- Built client input forms and comparison dashboard for viewing multiple insurance quotes
- Implemented real-time notifications using Socket.io and file upload with Multer
- Automated quote processing using Python scripts for data handling
- Technologies Used: React.js, Node.js, Express.js, PostgreSQL, Python, Socket.io, Multer

❖ **College Web Portal**

A comprehensive web-based solution to manage college operations effectively.

- Developed three user panels: Admin, Student, and Faculty
- Key Features: Manage student records, faculty data, and administrative tasks
- Technologies Used: React.js, Node.js, MongoDB
